## [TRANSLATION — TRADUCTION]

CONVENTION<sup>1</sup> BETWEEN THE FEDERAL REPUBLIC OF GERMANY AND THE GRAND DUCHY OF LUXEMBOURG ON MUTUAL ASSISTANCE IN THE EVENT OF DISASTERS OR SERIOUS ACCIDENTS

The Federal Republic of Germany and the Grand Duchy of Luxembourg,

Convinced of the need for co-operation between the competent institutions of both States in order to facilitate mutual assistance in the event of disasters or serious accidents and to expedite the dispatch of emergency personnel and equipment,

Have agreed as follows:

*Article 1.* 1. Each Contracting Party undertakes to assist the other Contracting Party in the event of disasters or serious accidents, to the extent of their ability and in accordance with the provisions of this Convention.

2. The nature and extent of assistance shall be determined by mutual agreement according to each specific case by the competent authorities designated in article 3 below.

*Article 2.* 1. Assistance shall be provided through the dispatch to the site of the disaster or serious accident, of emergency teams which have been specially trained, *inter alia*, in: firefighting, nuclear and chemical hazards control, first aid, rescue or clearing and which have the required specialized equipment for their operations.

Assistance shall be provided as a rule, on the German side, by disaster relief units (*Katastrophenschutz*), on the side of the Grand Duchy of Luxembourg, by civil defence units and fire brigades, and, if need be, in any other appropriate way.

2. The emergency teams may be dispatched by land, air or water.

*Article 3.* 1. The authorities of the Contracting Parties competent to request and initiate emergency measures shall be:

(a) The Minister of the Interior of the Federal Republic of Germany and the Minister of the Interior of the Grand Duchy of Luxembourg;

(b) In the frontier area:

—On the side of the Federal Republic of Germany:

In Rhineland-Palatinate: the Minister of the Interior or the Head of the Administrative Region (*Regierungspräsident*) of Trier appointed by him;

In the Saar: the Minister of the Interior;

—On the side of the Grand Duchy of Luxembourg:

The Minister of the Interior.

<sup>1</sup> Came into force on 1 December 1981, i.e., the first day of the second month following the exchange of the instruments of ratification, which took place at Bonn on 16 October 1981, in accordance with article 15 (2).

2. However, where necessary, assistance shall be requested directly and granted by the competent authorities of frontier communes and districts (*Kreise*), with the exception of assistance by air.

3. The Ministers of the Interior of each Contracting Party shall take the necessary action to establish contact between the authorities referred to in subparagraph (b).

*Article 4.* 1. In order to ensure the effectiveness and speed necessary for an emergency operation, the Contracting Parties shall undertake to limit common frontier-crossing formalities to the absolute minimum.

2. The leader of an emergency team shall only be required to carry a certificate indicating the emergency operation, the type of unit and the number of persons comprising it. The certificate shall be issued by the authority to which the unit reports. The members of the emergency team shall be exempt from passport and residence permit requirements.

3. If, in a particularly urgent case, the certificate referred to in paragraph 2 above cannot be presented, any other appropriate certificate indicating that the frontier is to be crossed for the purpose of carrying out an emergency operation shall suffice.

4. If the urgent nature of the case so requires, the frontier crossing may take place at points other than the authorized crossing points. The competent frontier surveillance authorities shall be given prior notification to that effect.

*Article 5.* 1. For the purposes of this article and of the following article:

The term "items of equipment" means the material, vehicles and personal equipment intended for use by emergency teams;

The term "means of emergency aid" means additional equipment and other goods brought in for a given operation and intended for distribution among the affected population;

The term "operational goods" means the goods necessary for using the items of equipment and for supplying the teams.

2. The Contracting Parties shall facilitate frontier crossings for the items of equipment, means of emergency aid and operational goods required for emergency operations and belonging to the emergency teams dispatched in accordance with article 2 above. Such items of equipment, means of emergency aid and operational goods shall, in the territory of the requesting Contracting Party, be deemed subject to a régime of temporary admission.

3. The emergency teams shall bring in no goods other than the items of equipment, means of emergency aid and operational goods necessary for emergency operations.

4. The means of emergency aid and operational goods brought in shall be exempt from any import taxes in so far as they are used up during emergency operations. The items of equipment and any means of emergency aid and operational goods which have not been used up during the emergency operation shall be re-exported.

If, owing to special circumstances, they cannot be re-exported, their nature and quantity as well as their situation shall be reported to the authority responsible for the emergency operations, who shall notify the competent customs service; in

that case, the domestic legislation of the requesting Contracting Party shall be applicable.

5. The prohibitions and restrictions on transfrontier traffic of goods shall not be applicable to goods which are exempt from taxes under paragraphs 2 and 4 of this article. The import of narcotic drugs into the territory of the other Contracting Party under the present Convention and the re-export of the unused quantities shall not be regarded as import or export within the meaning of the international Convention on Narcotic Drugs. Narcotic drugs may be brought in only to meet an urgent medical need and may be used only by qualified medical personnel acting in accordance with the legal provisions of the requested Contracting Party. The foregoing shall be without prejudice to the right of the requesting Contracting Party to conduct on-the-spot inspections.

6. No import or export documents shall be required or issued for the items of equipment, means of emergency aid or operational goods. The leader of an emergency team shall, however, carry a brief inventory of the items of equipment, means of emergency aid and operational goods brought in, certified, except in urgent cases, by the authority to which the emergency team reports.

7. The import of items of equipment, means of emergency aid and operational goods at points other than the authorized frontier-crossing points shall be reported as soon as possible to the competent customs service.

*Article 6.* 1. Aircraft may be used not only for the speedy transport of emergency teams in accordance with article 2, paragraph 2, but also directly for other emergency operations.

2. Each Contracting Party shall authorize aircraft used by the other Contracting Party to overfly its territory and to land in and take off from its territory even at points outside airfields.

3. The intention to use aircraft shall be reported without delay to the competent authorities designated in article 3 above, with information as precise as possible on the type and registration mark of the aircraft and its crew, cargo, departure time, anticipated route and landing site.

4. The following shall apply *mutatis mutandis*:

- (a) The provisions of article 4 above, to the crew and transported emergency teams;
- (b) The provisions of article 5 above, to the aircraft and other items of equipment, means of emergency aid and operational goods brought in.

5. The procedures for implementing paragraph 3 of this article may be set forth in the special arrangements provided for in article 10.

6. Subject to the provisions of paragraph 2 of this article, the air traffic legislation of each Contracting Party shall remain applicable, in particular the obligation to transmit flight information to the competent control bodies.

*Article 7.* 1. In all cases, the authorities of the requesting Contracting Party shall be responsible for directing the rescue and emergency operations.

2. Instructions for the emergency teams of the requested Contracting Party shall be transmitted solely to their leaders, who shall brief their personnel on the plan of action. The competent authorities of the Contracting Party requesting assistance shall, if possible, specify, in the request for assistance, the duties which

they intend to assign to the emergency teams of the Contracting Party called upon to give assistance.

3. The authorities of the requesting Contracting Party shall extend protection and assistance to the emergency teams of the requested Contracting Party.

*Article 8.* 1. The costs of assistance provided by the emergency teams of the requested Contracting Party under article 2 above, including expenses arising from the loss and total or partial destruction of equipment brought in, shall not be borne by the authorities of the requesting Contracting Party. In the event of assistance provided by aircraft, the requested Contracting Party may require that one half of the costs arising from the use of aircraft be borne by the requesting Contracting Party. The amount of these costs shall be assessed on the basis of the general tariffs in effect in each of the two States, as set forth in the special arrangements provided for in article 10 of this Convention.

2. However, the emergency teams of the requested Contracting Party shall be provided with food and lodging throughout the operation at the expense of the requesting Contracting Party and supplied with operational goods if the stocks brought in have been used up. They shall also receive, if necessary, any required medical assistance.

*Article 9.* 1. Each Contracting Party shall waive any claim for compensation against the other Contracting Party in the event of damage to property belonging to it or belonging to a political or administrative subdivision if such damage was caused by a member of an emergency team of the other Contracting Party in the performance of his duties in implementation of this Convention.

2. Each Contracting Party shall waive, for itself and its political or administrative subdivisions, any claim for compensation against the other Contracting Party arising from damage to a member of an emergency team who has been injured or has died in the line of duty in implementation of this Convention.

3. In the event that, in the territory of the requesting Contracting Party, damage is caused to a third party by a member of an emergency team of the requested Contracting Party in the performance of his duties, the requesting Contracting Party or its requesting political or administrative subdivision, as the case may be, shall be responsible for the damage, in accordance with the provisions which would have applied if such damage had been caused by its own emergency teams.

4. The authorities of the Contracting Parties shall co-operate closely so as to facilitate the settlement of claims for compensation. They shall, in particular, exchange all the information at their disposal concerning damage cases covered by this article.

5. This article shall also apply to jointly organized exercises for emergency teams.

*Article 10.* 1. The competent authorities referred to in article 3, paragraph 1 above, shall conclude the special arrangements necessary for implementing this Convention.

2. A special arrangement shall include the following information essential for carrying out operations:

(a) The official designation and duties of the persons authorized to request, offer and grant assistance, and the name, address and telephone number of the services to which these persons belong;

- (b) The official designation and duties of the person to whom the leader of the emergency team is to report on his arrival at the place of assignment, and the name, address and telephone number of the service to which that person belongs;
- (c) The nature, number, strength, equipment and site of the units which can, on request, be dispatched for emergency operations;
- (d) Any other information likely to accelerate and facilitate the assistance, in particular, concerning telecommunication links which exist or may be established between the services referred to in subparagraphs (a) and (b), concerning landing sites for aircraft.

3. Another special arrangement shall be concluded in respect of the operation of radio installations with which the emergency teams are equipped or which are placed at their disposal.

4. A special arrangement shall also be concluded concerning the tariffs in effect in each of the States and serving as the basis for the sharing of costs arising from the use of aircraft in accordance with article 8, paragraph 1.

5. A special arrangement may, where necessary, provide for the joint holding of exercises on either side of the frontier.

*Article 11.* 1. In order to forecast, prevent and deal with disasters or serious accidents more effectively, the Contracting Parties agree to establish permanent and close co-operation by exchanging all useful information of a scientific and technical nature and scheduling regular meetings.

2. Such co-operation shall be carried out:

—For the Government of the Federal Republic of Germany, by the Federal Minister of the Interior and,

—For the Government of the Grand Duchy of Luxembourg, by the Minister of the Interior.

3. In addition, joint studies and meetings may be organized, with a view, in particular, to investigating the causes of disasters and to improving forecasting and the ways and means of preventing and dealing with disasters or serious accidents.

4. Training courses may be organized on the initiative of either Contracting Party for technicians and supervisory staff of the other Contracting Party and, in particular, for emergency teams.

5. The procedures for implementing this article shall be set forth in special arrangements.

*Article 12.* Any dispute relating to the implementation of this Convention which cannot be settled by the competent authorities referred to in article 3 shall be settled through the diplomatic channel.

*Article 13.* This Convention is concluded for an indefinite period. Five years after its entry into force, it may be denounced at any time on one year's notice.

*Article 14.* With the exception of those provisions of this Convention which relate to air traffic, this Convention shall also apply to *Land Berlin*, unless the Government of the Federal Republic of Germany makes a contrary declaration to

the Government of the Grand Duchy of Luxembourg within the three months following the entry into force of this Convention.

*Article 15.* 1. This Convention shall be ratified; the instruments of ratification shall be exchanged as soon as possible at Bonn.

2. This Convention shall enter into force on the first day of the second month after the exchange of the instruments of ratification.
